## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The Examiner has carefully considered Applicant's Response of 4/14/05. The Examiner has determined that the full disclosure to Woolf et al. does contain language to helical gear forming which was missed by the Examiner in the past Action. Thus, a new rejection, withdrawing the indication of allowability is made, which is accordingly not made final.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 1-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Woolf et al. '754 (Woolf et al.).

Woolf et al. discloses a method and apparatus for densifying a tooth portion of a powder metal gear comprising:

sintering a powder metal preform (col. 1, lines 53-55); and

densifying the sintered metal preform by axially passing the preform through a set of dies wherein the set of dies contain broadened portions (46) that allow for a tooth of the preform to expand and further contains a spacer (22).

Woolf et al. further discloses wherein the preform is axially moved through the set of dies so as to gradually densify the teeth of the preform.

The Examiner finding that the protrusion and recession sections of Woolf et al. meet the hour-glass limitation.

Woolf et al. further discloses wherein the plates can be provided with appropriate angular lead or helix and wherein the preform is rotated as it is fed axially through the die plates to accommodate a helical gear tooth form (col. 3, lines 14-18).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel J. Jenkins whose telephone number is 571-272-1242. The examiner can normally be reached on M-TH6:30AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy King can be reached on 571-272-1242. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
